

Dysport/Botox Post Care Instructions

- Dysport/Botox starts working in 3-4 days post injection.
- Injections typically last 3-4 months depending on your metabolism.
- **It is fully kicked in and working at its hardest in 2 weeks.**
- If you are needing any adjustments, you can make an appointment at 2 weeks. Not before and not after.

Post Care Instructions

- Please move the treated area for 1 hour after treatment. (ex. Frowning or lifting eyebrows) - this may help to disperse the toxin and help it kick in quicker.
- No bending over, laying down or exercising for 4 hours after your treatment.
